Is Jesus' promise to live on through his believers true? Can we find the living Christ in today's complicated, uneasy world? Harold Fickett explores these questions in *The Living Christ*, a journey throughout the world in search of individual Christians whose daily lives reflect different aspects of the resurrected Christ. Fickett profiles a woman who rescues girls from prostitution in Thailand, a "trucker chaplain" in South Carolina, a visionary living on the California coast, an America priest who conducts a healing ministry in Mexico City, and others who carry out the work of Christ in difficult, sometimes desperate circumstances. Written with narrative flair and offering surprising theological insights, these real-life stories stimulate new and enlightening meditations on Jesus the Liberator, Wayfarer, Contemplative, Healer, and Martyr. Like the writings of Thomas Merton, Henri Nouwen, and Philip Yancey, *The Living Christ* will appeal to all who seek a deeper spirituality.

"There's nothing semi about Finn Murphy's trucking tales of *The Long Haul*."—Sloane Crosley, *Vanity Fair*
More than thirty years ago, Finn Murphy dropped out of college to become a long-haul trucker. Since then he's covered more than a million miles as a mover, packing, loading, hauling people's belongings all over America. In *The Long Haul*, Murphy recounts with wit, candor, and charm the America he has seen change over the decades and the poignant, funny, and often haunting stories of the people he encounters on the job.

Technologies and Approaches to Reducing the Fuel Consumption of Medium- and Heavy-Duty Vehicles evaluates various technologies and methods that could improve the fuel economy of medium- and heavy-duty vehicles, such as tractor-trailers, transit buses, and work trucks. The book also recommends approaches that federal agencies could use to regulate these vehicles' fuel consumption. Currently there are no fuel consumption standards for such vehicles, which account for about 26 percent of the transportation fuel used in the U.S. The miles-per-gallon measure used to regulate the fuel economy of passenger cars. is not appropriate for medium- and heavy-duty vehicles, which are designed above all to carry loads efficiently. Instead, any regulation of medium- and heavy-duty vehicles should use a metric that reflects the efficiency

with which a vehicle moves goods or passengers, such as gallons per ton-mile, a unit that reflects the amount of fuel a vehicle would use to carry a ton of goods one mile. This is called load-specific fuel consumption (LSFC). The book estimates the improvements that various technologies could achieve over the next decade in seven vehicle types. For example, using advanced diesel engines in tractor-trailers could lower their fuel consumption by up to 20 percent by 2020, and improved aerodynamics could yield an 11 percent reduction. Hybrid powertrains could lower the fuel consumption of vehicles that stop frequently, such as garbage trucks and transit buses, by as much 35 percent in the same time frame.

An updated look at how corporate restructuring really works Stuart Gilson is one of the leading corporate restructuring experts in the United States, teaching thousands of students and consulting with numerous companies. Now, in the second edition of this bestselling book, Gilson returns to present new insight into corporate restructuring. Through real-world case studies that involve some of the most prominent restructurings of the last ten years, and highlighting the increased role of hedge funds in distressed investing, you'll develop a better sense of the restructuring process and how it can truly create value. In addition to "classic" buyout and structuring case studies, this second edition includes coverage of Delphi, General Motors, the Finova Group and Warren Buffett, Kmart and Sears, Adelphia Communications, Seagate Technology, Dupont-Conoco, and even the Eurotunnel debt restructuring. Covers corporate bankruptcy reorganization, debt workouts, "vulture" investing, equity spin-offs, asset divestitures, and much more. Addresses the effect of employee layoffs and corporate downsizing Examines how companies allocate value and when a corporation should "pull the trigger" From hedge funds to financial fraud to subprime busts, this second edition offers a rare look at some of the most innovative and controversial restructurings ever.

To help assess proposals for further changes in federal truck weight limits, Congress requested this study through Section 158 of the Surface Transportation and Uniform Relocation Assistance Act of 1987. To conduct the study, the National Research Council convened a special Transportation Research Board committee with experts in pavements, bridges, highway safety, freight transportation economics, motor vehicle design, highway administration, motor carrier operations, and enforcement of motor vehicle regulations. The study focused on four issues identified in the study request that involve potential changes to federal weight limits for Interstate highways: (1) Elimination of existing grandfather provisions; (2) Alternative methods for determining gross vehicle weight and axle loadings; (3) Adequacy of the current

federal bridge formula; and (4) Treatment of specialized hauling vehicles--garbage trucks, dump trucks, and other trucks with short wheel bases that have difficulty complying with the current federal bridge formula. For each of these issues, the study committee estimated the nationwide effects of changes in federal limits proposed by the trucking industry, highway agencies, and other groups. Projections of heavy-truck miles by type of truck, region of the country, highway functional class, and operating weight were developed for a base case and alternative truck weight regulatory scenarios. These projections were then used to estimate impacts on truck costs, pavements, bridges, and safety.

Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.
