Advanced Building Construction

This publication breaks new ground. It is the first document to provide extensive life-span assessments (for insurance purposes) for a wide range of building components which are classified within the concept of quality specifications. A further benefit is that it does not seek to be prescriptive. It indicative 'benchmarks' against which new or differing specifications can be assessed, in that sense it is both robust and flexible.

A Manual of Building Construction

Unique in that it is the only reference organized according to the 16 divisions of the CSI MASTERFORMAT. This revision broadens its scope to include a number of changes in the MASTERFORMAT since 1980. Additional material focuses on such business areas as contract documents, bonding, construction management, OSHA, financing, project management, design-build and much more. The new index has been alphabetized making it much easier to use.

Manual of Steel Construction

Construction work-site safety is an important part of a builder's cost of doing business. This text is a guide to managing residential and light commercial construction safety. It addresses why and how contractors must educate themselves and their crews to practice safety at work.

Manual of Steel Construction. 7th Ed

This UPDATED manual is for fire department staff and others who review plans for compliance with fire and building codes to ensure public safety in the built environment. Content in this book is appropriate for any plan examiners in fire prevention divisions, fire marshal bureaus, building departments and community risk reduction organizations. The 15 chapters in this book present material that meets the job performance requirements (JPRs) of Plan Examiner I and II according to the NFPA 1031: Professional Qualifications for Fire Inspector and Plan Examiner (2014). Plan Examiner II requires an in-depth review of sprinkler and fire alarm shop drawings and these are not included in this book. Four hundred and twenty key terms and definitions are highlighted throughout the book and are included in the glossary. The book features updated photos and illustrations. A sample set of blueprints are referenced in the book and are available to purchase in a package with the text. This text book is used frequently in higher education classes as well as courses to meet the requirements for fire service professional qualifications certification. The author is Ed Prendergast a well-respected Fire Protection Engineer. He retired from the Chicago Fire Department as the Chief Engineer of the Bureau of Fire Prevention after 30 years of service. He is a graduate of the Illinois Institute of Technology with degrees in Industrial and Mechanical Engineering. As a professional engineer, Mr. Prendergast serves as a member of the Society of Fire Protection Engineers. He is a principal member of the National Fire Protection Association technical committee on standpipes. Mr. Prendergast is an instructor in Fire Science with the City Colleges of Chicago. He is also forensic engineer with Wolf Technical Services of Indianapolis.

Manual of Steel Construction

Building Inspections are done-- and required-- for all sorts of reasons: real estate assessments, safety, maintenance and repair, and facility inventories, among others. This new, concise guide to building inspections covers them all, using a clear, easy-to-follow checklist approach. All major building components, from site inspections to exterior and interior and structural inspection are covered. Expert help in writing up inspection summaries and recommendations will also be provided. The book will also give the reader additional Industry resources and informational sources for further reading and reference.

House Builders Health and Safety Manual 2008

This new IFSTA manual details the training required of Company Officers according to NFPA® 1021, Standard for Fire Officer Professional Qualifications, 2014 Edition. The manual is divided into two sections to make a clear distinction between the information needed for Fire Officer Level I and Fire Officer Level II. Both print and eBook formats are available. There is no shortage of issues that a company officer might face in the everyday operation of a fire company or unit. This manual addresses the wide range of topics and issues encountered by a company officer, from leadership and supervision to health and safety issues. Great attention was given to focus on the job performance requirements of NFPA® 1021. The fifth edition of Fire and Emergency Services Company Officer builds on the previous edition of the manual while presenting the material in a more concise manner to make it easier for students to read and instructors to teach. By merging related topics, the number of chapters was reduced from 32 in the fourth edition to 17 in the new manual while preserving the material related to the NFPA® standard. The number of appendices was reduced from 20 to 4 by removing information that can be found in other media. Along with reducing the volume of material from the fourth edition, the fifth edition of Fire and Emergency Services Company Officer offers several new features. The manual features a new look with IFSTA's single-column format and upgraded and updated curriculum components. Learning activities are included to help instructors present the material to their students. Case Histories open each chapter to illustrate important lessons learned in the real world. Photographs, illustrations, and tables are included throughout the manual to illustrate key points and improve the overall instructional value of the material.

HAPM Component Life Manual

Fire and Emergency Services Instructor Eighth Edition helps students meet the job performance requirements of NFPA(R) 1041, Standard for Fire Service Instructor Professional Qualifications (2012) for Instructor levels I, II, and III. The manual also provides a reference for instructors who may perform duties outside of their current certification levels. This new edition has been reorganized to provide clearer separations between the three instructor levels: Ch. 1-9 cover Level I; Ch. 10-14, Level II; and Ch. 15-17 Level III. The text has been shortened from 22 chapters to 17. As a result, the text is more concise and easier to teach. The text reflects new changes in the NFPA(R) standard, including a discussion of bias in instructional and testing materials.

Building construction for fire suppression forces

Brannigan's Building Construction for the Fire Service, Fourth Edition is a must read for fire fighters,

prospective fire fighters, and fire science students. This edition continues the Brannigan tradition of using plain language to describe technical information about different building types and their unique hazards. This text ensures that critical fire fighting information is easy-to-understand and gives valuable experience to fire fighters before stepping onto the fireground. The first edition of Building Construction for the Fire Service was published in 1971. Frank Brannigan was compelled to write the most comprehensive building construction text for the fire service so that he could save fire fighters' lives. His passion for detail and extensive practical experience helped him to develop the most popular text on the market. His motto of: "Know your buildings," informs every aspect of this new edition of the text. Listen to a Podcast with Brannigan's Building Construction for the Fire Service, Fourth Edition co-author Glenn Corbett to learn more about this training program! Glenn discusses his relationship with the late Frank Brannigan, the dangers of heavy construction timber, occupancy specific hazards, and other areas of emphasis within the Fourth Edition.
