Embrace off-grid green living and imagine a more sustainable future with the original guide to self-sufficiency. For over 40 years, John Seymour has inspired thousands to make more eco-friendly choices with his advice on living sustainably. The New Complete Book of Self-Sufficiency offers step-by-step instructions on everything from chopping trees to harnessing solar power; from growing fruit and vegetables, and preserving and pickling your harvest, to baking bread, brewing beer, and making cheese. Seymour shows you how to live off the land, running your own smallholding or homestead, and raising (and butchering) livestock. In a world of mass production, intensive farming, and food miles, Seymour's words offer an alternative: a celebration of investing time, labour, and love into the things we need. While we won't all be able to move to the countryside, we can appreciate the need to eat food that has been grown ethically or create things we can cherish, using skills that have been handed down through generations. This bestselling classic is a balm for anyone who has ever sought solace away from the madness of modern life.

Storey's Guide to Raising Dairy Goats, 4th Edition

Sustainable horticulture is gaining increasing attention in the field of agriculture as demand for the food production rises to the world community. Sustainable horticultural systems are based on ecological principles to farm, optimizes pest and disease management approaches through environmentally friendly and renewable strategies in production agriculture. It is a discipline that addresses current issues such as food security, water pollution, soil health, pest control, and biodiversity depletion. Novel, environmentally-friendly solutions are proposed based on integrated knowledge from sciences as diverse as agronomy, soil science, entomology, ecology, chemistry and food sciences. Sustainable horticulture interprets methods and processes in the farming system to the global level. For that, horticulturists use the system approach that involves studying components and interactions of a whole system to address scientific, economic and social issues. In that respect, sustainable horticulture is not a classical, narrow science. Instead of solving problems using the classical painkiller approach that treats only negative impacts, sustainable horticulture treats problem sources.

This book critically examines how Walt Disney Animation Studios has depicted – and sometimes failed to depict – different forms of harming and objectifying non-human animals in their films. Each chapter addresses a different form of animal harm and objectification through the theories of speciesism, romanticism, and the ‘collapse of compassion’ effect, from farming, hunting and fishing, to clothing, work, and entertainment. Stanton lucidly presents the dichotomy between depictions of higher order, anthropomorphised and neotonised animal characters and that of lower-order species, showing furthermore how these depictions are closely linked to changing social attitudes about acceptable forms of animal harm. An engaging and novel contribution to the field of Critical Animal Studies, this book explores the use of animals not only in Disney’s best known animated films such as 101 Dalmatians, but also lesser known features including Home on the Range and Fun and Fancy Free. A quantitative appendix supplying data on how often each animal species appears and the amount of times animal harm or objectification is depicted in over fifty films provides an invaluable resource and addition to scholars working in both Disney and animal studies.
